

DX6i Can Not be Master for Wireless Trainer by Buschbarber & Xeric

If your plan is to use the DX6i as the Master and the DX9 as the Slave, you cannot do that wirelessly. You cannot Bind a DX9 to a DX6i. You can Bind a DX6i to a DX9 and use the DX6i as a wireless buddy box.

The whole trick behind "wireless training" is a receiver built into the DX9 (and the other new radios). The DX6i has none; hence, it's a one-way trick (i.e. can only be the Slave).
