All planes are new in original box (except for the Habu and spare parts for the AeroScout) and never flown. In one or two cases I took the plane out of the box to inspect it and see how much room I had for electronics, but all pieces were put back in the box the same way they were originally packed. Why am I selling? I just don't need these planes. I recently switched from Spektrum to PowerBox, and it's just silly to put \$1000 worth of electronics into a \$100 model (even though that's exactly what I just did with my xFly Tasman). Long story short, these are some nice kits. Details below.

FMS Ranger 1220 V2 PNP (Green without floats):

This is a fantastic beginner RC kit. I purchased it to start learning the intricacies of PowerBox iGyro, however my PowerBox iESC didn't fit and I wanted full telemetry, so it went back in the box and now you can have it for \$100. It's a cool plane, especially for \$100.

Retail Price: \$170

Sale Price: \$100

xFly Glastar V2 1233mm PNP:

This is an awesome RC plane. I purchased it and just never got around to flying it. The Glastar is a 4-channel plane (no flaps) which makes it absolutely perfect for easy, no-stress flying. This is a high-quality kit. I like these xFly kits a lot.

Retail Price: \$210

Sale Price: \$120

Freewing T-33 Shooting Star USAF 80mm EDF Jet PNP:

I have 8 Freewing EDF jets; they are all super high-quality kits that fly fantastic!

Retail Price: \$439

Sale Price: \$280

E-Flite Viper 90mm EDF Jet BNF Basic with AS3X and SAFE Select:

This is the cult classic E-Flight EDF jet. Considered by many as the best EDF on the market! I picked this up when I was a Spektrum guy. While it would be pretty cool to put in PowerBox electronics, I have decided against it and now you can own this classic for \$450.

Retail Price: \$690

Sale Price: \$450

FMS Futura 80mm V3 PNP:

Another example of a high-quality EDF jet. This is a fantastic flyer and a great kit, and it looks really cool.

Retail Price: \$390

Sale Price: \$260

Extra 330 SC 3D 1.3m BNF Basic with AS3X and SAFE Select:

While 3D flying is awesome, it's just not my thing. This plane is beautiful and capable.

Retail Price: \$400

Sale Price: \$260

Set of Spare parts for Habu SS (Super Sport) 70mm EDF Jet:

This is a weird one; does not come in original box. I opened this up and took out all the electronics because I was going to convert it to PowerBox setup, but I never finished it. Most of the parts are in a generic brown box and someone with a few skills could easily reassemble it. Please note that there is no ESC or receiver in this box of spare parts.
